IDENTITY PROTECTION

On November 1, 2008, Eversource implemented additional identity protection measures to safeguard our customers' confidential account information. These measures will help us to protect your confidential personal information and ensure only authorized access to your account. For current customers requesting account information or access, Customer Service Representatives will ask several simple questions to verify the caller's identity and their right to access the requested account information. We are committed to providing the excellent customer service you deserve and the timely information you need to manage your energy use.

Choosing an Energy Supplier

FAQs

How to Switch Your Energy Suppliers

What to Ask Suppliers

Suppliers and Aggregators

A webpage that provides electric customers with one location to easily compare the products and prices offered by competitive energy suppliers is now available. Using the new comparison shopping webpage, you can select what type of customer you are (residential or small commercial), and then select your local distribution utility (Eversource, Liberty Utilities, NH Electric Cooperative, or Unitil). Based on those selections, you can then easily scroll through the various products and prices offered by competitive energy suppliers and determine which offer would best meet your needs.

- Compare competitive electric rates

Questions about how to choose a competitive energy supplier? See our [frequently asked questions](#). If you currently receive an Electric Assistance Program (EAP) discount and you switch to a competitive supplier, you will lose the EAP discount on the energy supply portion of the bill. The amount you save by choosing a competitive energy supplier may be offset by the partial loss of the EAP discount. Look carefully at your bill to determine what the savings will be and whether those savings will make up for the loss of the discount on the energy portion of your bill before making a change.

SHOP for ELECTRIC RATES

Please choose an account type and then an electric power supplier.

Residential

Small Commercial

Large Commercial
and Industrial

Remember, regardless of who you buy your electricity from, you will continue to call your electric utility for outages, emergency services and questions about your service. If you have questions about choosing a competitive energy supplier, please contact the NH Public Utilities Commission at 1-800-852-3793 or at puc@puc.nh.gov.

When I change my competitive energy supplier, do I have to notify my electric utility?

No. Your competitive energy supplier will notify your electric utility for you.

How long does it take to switch my energy supplier?

Whether you are changing to energy supply service provided by a competitive supplier or changing back to the energy supply service provided by your electric utility, the change will occur at the time of your next meter read provided the request to change is received by your electric utility a few days in advance of your next meter read date. Because your electric bill is for the service provided in the approximately 30 day period before the meter is read, you would not see the change until the following bill.

I receive bill assistance from the Electric Assistance Program (EAP). Will my assistance be affected if I switch to a competitive energy supplier?

Yes. If you currently receive an Electric Assistance Program (EAP) benefit and you switch to a competitive energy supplier, you will lose the EAP benefit on the energy supply portion of your bill. The amount you save from choosing a competitive energy supplier may be offset by the partial loss of the EAP benefit, so look carefully at your bill to determine what your savings will be before you make a choice.

Are competitive energy suppliers regulated?

While the Commission has established some consumer protection requirements that competitive energy suppliers must follow, the prices offered by these suppliers are *not* regulated by the Commission. If you are considering choosing a competitive energy supplier, here are some questions you may want to ask.

• [What to Ask Suppliers](#)

What happens if my competitive energy supplier is unable to continue to provide me with energy service?

Your energy service will automatically transfer to the energy service provided by your electric utility. Your lights will not go out, and there will be no penalty or fee to you. When you receive your next bill, you will see two prices for energy service – one for the period of time when the competitive energy supplier provided your energy service and the other for the time when your electric utility provided your energy service.

Can I end my contract with my energy supplier if I'm not satisfied?

You can always cancel your contract with your competitive energy supplier. There may be a fee if you cancel your contract before a certain date though. Review your agreement with your competitive energy supplier to see if there are any penalties for cancellation. If there are, call your competitive energy supplier and explain why you are not satisfied. Ask if they will waive any fees.

If I sign up with a new supplier, will I be treated differently by my local electric utility?

Absolutely not. If your power goes out or you need assistance from your local electric utility, you

The big picture: He feels it's totally worth it to support renewable energy. He believes the environmental cost of "dirty" energy still gets overlooked. And installing solar panels on the roof isn't financially feasible for most people.

GREEN-E PROGRAM UPDATE

Arcadia Power Decertified Due to Non-Compliance

April 17, 2018

Posted April 17, 2018, updated April 20, 2018.

Please be advised that Arcadia Power is no longer a participant in the Green-e® Energy certification program, effective April 10, 2018. Center for Resource Solutions (CRS) has removed Arcadia Power from the Green-e® Energy program, and terminated for cause its contract for certification of the “Arcadia Power Wind Energy” REC product.

CRS took this action in response to Arcadia Power’s failure to comply with several Green-e® Energy program requirements concerning product marketing and Green-e® logo use. In particular, the company violated rules in the *Green-e® Energy Code of Conduct* regarding product representation; information disclosure to customers

Green-e Energy program requirements concerning product marketing and Green-e logo use. In particular, the company violated rules in the *Green-e Energy Code of Conduct* regarding product representation; information disclosure to customers (including product content, price, terms and conditions); the proper display of the Green-e logo; and submission of marketing materials for Green-e review.

This decertification applies on a going-forward basis. Arcadia Power's sales of its "Arcadia Power Wind Energy" REC product between July 1, 2015 and December 31, 2016 remain Green-e certified and are not affected by this action. Sales of this product between January 1, 2017 and April 9, 2018 are subject to verification in accordance with Green-e Energy program requirements. Decisions concerning 2017 sales are expected to be made in August 2018. CRS is not able to comment on the status of individual sales during the periods that remain subject to verification until a final determination is made.

Pursuant to Section V.E of the *Green-e Energy Code of Conduct*, Arcadia Power is required to notify its customers of decertification within 60 days.

If you have questions concerning this notice, please contact Jeff Swenerton at jeff.swenerton@resource-solutions.org or 415-561-2119.

Please refer to this notice for additional information, as this page will be updated to the extent new information becomes available.
